is pleased to offer a complete course of training leading to certification in Phlebotomy

- Three-week course includes both classroom training and hands-on clinical practice.
- Class is taught by experienced Saad Healthcare nursing professionals.
- Upon graduation, students take the national certification exam, which is administered at Saad’s classroom facility.
- Employment opportunities are widely available for phlebotomy graduates.
- A new class forms every three weeks, with 10 students per class.

Tuition: $515 (textbook to be purchased separately; testing fee is additional $140)

For more information, call 343-9600.

Saad’s Phlebotomy training is structured to teach the techniques, skills, and equipment required for safe and effective blood and specimen collection. Specific topics of instruction include:

- The basic functions of a phlebotomist.
- Methods for effective communication.
- Professional ethics and legal and regulatory issues related to blood and specimen collection.
- Safety and infection control and documentation and transportation procedures.
- The basics of anatomy and physiology with an emphasis on the circulatory system.
- Blood collection equipment and supplies.
- Clinical and technical complications that may occur during a procedure.
- Special procedures for pediatric, arterial and IV collections, elderly, homebound, and long-term care patients.
- Body fluid specimens that are analyzed in the clinical laboratory and procedures for collecting and transporting these specimens.
- Testing for drug use, forensic toxicology, workplace testing, and sports medicine.
